

York Region Supervisor's Association

Welcomes you to our October 21, 2010 Meeting,
featuring the following two presentations

INFLUENZA PREVENTION

The focus of this presentation will be on influenza and the impact it has on daycares. Some of the topics that will be reviewed are; what is influenza, how it is transmitted, and prevention including vaccines. We will also discuss how it impacts the children and the staff in the daycares. Presented by **Michelle Johnson** R.N., BSc.N., BSc. York Region Health Services , Infectious Disease Control Division

MANAGING RISKS IN CHILD CARE ORGANIZATIONS

Child cares, like all other businesses, should regularly undertake a comprehensive and focused assessment of potential risks to the organization to ensure that their policies, procedures, and practices are up to date, and provide adequate protection. It is critical to manage risk because most child care organizations do not have the financial resources to pay out for losses or law suits.

Child Care is not immune to the financial risks associated with running a business.

There is an old saying that "an ounce of prevention is worth a pound of cure", and having a comprehensive Risk Management assessment to review the most common areas of risk is your best protection.

Presented by **Joy Lerman and Terri Carr**, Professional Development Consultant TJ Solutions

TIME: 9:30 am – 11:30am

LOCATION: Tollgate A Room, Langstaff Community Centre,
155 Red Maple Road, Richmond Hill L4B 4P9
